MATERIAL TO BE HANDLED

ANY TYPE OF SLABS AND UNIFORM HEAVY PARTS HANDLING

Automatic locking-unlocking system

Specific arm design for slabs handling manufactured in high strength steel (700 Mpa) with wear resistant steel in contact surfaces

Structure validated by Finite Elements Analysis

Equipment needed

- Lifting hooks or cables.

Technical information

- Robust structure in high strength steel.
- Assured load through maximum penetration force.
- Ideal relation between capacity / dead weight.
- Design & fabrication according to standard FEM 1001/98 section I.
- CE conformity.
